SECURITIES OFFERINGS

EXPLANATORY NOTES

The data in these tables cover substantially all new issues of securities offered for cash sale in the United States in amounts over \$100,000 and with terms to maturity of more than one year. The figures represent offerings, not actual sales. However, the proportion of the total remaining unsold is believed to be small and the unsold amount is composed chiefly of non-underwritten issues of small companies. Included in these tables are issues privately placed as well as issues publicly offered, and unregistered issues as well as many registered under the Securities Act of 1933.

Registered offerings as shown in these tables differ from data included in the tables captioned "Effective Registrations Under the Securities Act of 1933" in several respects, the more important being: (1) only issues offered for cash sale for account of issuers are included here; (2) securities sold through continuous offering, such as issues of open-end investment companies and employee-purchase plane, are excluded; and (3) issues are entered in the offerings statistics as of the actual date of public offering, which is not always the same as the date of effective registration.

Among the issues exempt from registration under the Securities Act of 1933 but included in these statistics are: Issues privately placed; intrastate offerings; securities of railroad companies; issues of the Federal government, state and local governments, banks, eleemosynary institutions; and issues between \$100,000 and \$300,000 in size offered pursuant to amendment of Regulation A of the Securities Act of 1933. Dates of offering of issues in the latter category are taken from letters of notification filed by the issuers and although actual offering dates are frequently changed the statistics are not revised because small amounts are involved.

Excluded from the data on new cash offerings are: Notes issued exclusively to commercial banks; intercorporate transactions; United States Government "Special Series" issues and other sales directly to Federal agencies and trust accounts.

Issues classified as privately placed are issues sold to a restricted number of investors without public offering. Issues sold by competitive bidding directly to ultimate investors are treated as publicly offered.

The chief sources of the data in these tables are the financial press and documents filed with the Commission. Data for offerings of state and municipal securities are from totals published by The Commercial and Financial Chronicle; unlike the other presented here, these represent principal amounts instead of gross proceeds. All figures are subject to revision as new data are received.

(See Explanatory Notes, Page 14)

THE SECURITIES EXCHANGES

EXPLANATORY NOTES

Data on the value and volume of securities sales in the first table were reported in connection with fees paid under Section 31 of the Securities Exchange Act of 1934. They include all sales effected on exchanges, with the exception that, since March 1944, United States Government issues are excluded. They cover odd-lot as well as round-lot transactions. It should be noted that most exchanges' reports for a given month cover transactions cleared during the calendar month and that clearances occur for the most part on the third day after the transaction date.

Each of the stock price indexes is a weighted index of weekly closing prices of selected common stocks on the New York Stock Exchange related to the average weekly closing prices of such stocks in January 1939. Since July 1950, the weights used have been the number of shares outstanding on June 30, 1950, with adjustments for stock splits, stock dividends, and offerings through rights. The groups represented include all industries which accounted for at least one percent of either the volume or value of common stock trading on the New York Stock Exchange in 1949. The active stocks chosen within each group give a coverage of at least 65% of volume and value of trading in the stocks of each industry in 1949. The indexes were revised in July 1950 to take account of the changing importance of certain industries and issues. Indexes for eight new industry groupings were added and the base values of the indexes for all other groups were adjusted so that these series are comparable with the corresponding indexes prior to July 1950. A more detailed explanation of the methods of computation, a history of changes in the indexes, and a list of stocks in the present series may be obtained upon request.

Total round-lot sales reported in this section of the Statistical Bulletin include all stock sales effected in round lots, but they exclude transactions in rights and warrants. Round-let transactions are transactions in the unit of trading or multiples thereof; odd-let transactions are those involving a number of shares less than the unit of trading. On the New York Stock Exchange, the unit of trading for most stocks is 100 shares; some less active stocks have a 10-share unit. On the New York Curb Exchange, the unit of trading for a given issue may be 100 shares, 50 shares, 25 shares, or 10 shares.

Total round-lot sales effected on the New York Stock Exchange are consistently larger than the round-let volume reported on the ticker of that exchange, inasmuch as the ticker or "reported" volume fails to include certain types of round-let transactions ordinarily amounting to from 5 to 10 per cent of round-lot sales on the exchange.

Total round-lot sales on the New York Curb Exchange differ from the round-lot volume on that exchange reported on the ticker, for the ticker or "reported" volume includes the round-lot sales of rights and warrants and fails to include certain classes of round-lot stock transactions.

Short sales in these tables include only those short sales which are restricted under the Commission's or Exchange's rules; "exempt" short sales are included in total sales.

As used in these tables, the term "members" includes regular and associate exchange members, their firms, and their partners, including special partners.

On the New York Stock Exchange, the transactions of specialists in stocks in which they are registered include all round-let transactions in an issue by a member for his own account or for his firm's account while the member was acting as specialist in that issue. Transactions for the odd-let account are excluded, as are transactions for the member's account in issues other than those in which he was acting as specialist. For specialists who also act as odd-lot dealers in certain issues, round-lot trades for their odd-let account are included with round-let trades of odd-lot dealers in the succeeding item.

On the New York Curb Exchange, round-let transactions of specialists in the stocks in which they are registered are not directly comparable with the round-let trades of specialists on the New York Stock Exchange, since on the former exchange odd-lot transactions are handled solely by specialists, and the round-lot transactions of specialists resulting from such odd-let transactions are not segregated from the specialists other round-let trades.

- Includes unincorporated business saving of the types specified. Does not include corporate government saving. Figures are rounded and will not necessarily add to totals. Asterisk (*) indicates less than \$50 million. These data have been compiled by the Commission from many different sources. Current data are necessarily estimates and all data are subject to revision.
- 2/ After deducting change in bank loans made for the purpose of purchasing or carrying securities.
- 3/ Includes Armed Forces Leave bonds.
- 4/ Mortgage debt to institutions on one- to four-family nonfarm dwellings.
- 2/ Largely attributable to purchases of automobiles and other durable consumers' goods, although including some debt arising from purchases of consumption goods. The other segments of individuals' debt have been allocated to the assets to which they pertain, viz., saving in savings and loan associations, insurance, and securities.
- 6/ Construction of one- to four-family nonfarm dwellings less net acquisition of properties by non-individuals.

 This item also includes a small amount of construction by non-profit institutions.
- 7/ Consumer expenditures on durable goods as estimated by the Department of Commerce.

- 1/ All U. S. corporations, excluding banks and insurance companies. Data for 1945-1947 are based on Statistics of Income, covering virtually all corporations in the United States. Data for 1948-1950 are estimates based on data compiled from many different sources, including data on corporations registered with the Commission. Because of the nature of the figures, these estimates are subject to revision.
- 2/ Tax refunds to corporations have been treated as shown on corporation books. Beginning with September 1945 they appear, for the most part, as decreases in Federal income tax liabilities and, to a lesser extent, as increases in other current assets. Small amounts may also appear as increases in U. S. Government securities and receivables from U. S. Government.
- 3/ Includes receivables from U. S. Government.
- 4/ Includes marketable securities other than U. S. Government.
- 5/ Includes advances and prepayments from U. S. Government.
- 6/ The post-war credits in excess profits taxes were not deducted from Federal income tax liabilities but were considered as non-current assets until they became due under the provisions of the Tax Adjustment Act of 1945.
- Includes provisions for renegotiation other than those combined with income tax liabilities.

NOTE: Figures are rounded and will not necessarily add to totals.
